

## **Provincial Urban Water Supply Projects**

LWUA's Water Supply Program is geared towards the attainment of the 3<sup>rd</sup> Key Result Area of the Aquino Administration – "Rapid, inclusive and sustained economic growth".

For 2014, LWUA targeted to complete 71 water supply construction projects nationwide. An estimated 35,636 households or 178,182 people are expected to benefit directly from sufficient supply of potable water upon completion of the said projects.

To sustain this development effort in water supply provisions, LWUA continues to provide financial and institutional development assistance.
